

AMP Balanced Growth Fund

Wholesale

Investment objective

The Fund aims to provide moderate capital growth and income over the suggested investment timeframe. It also aims to deliver a return greater than its performance benchmark (market indices weighted by the Fund's long-term benchmark) on a rolling three-year basis. You should be aware that although the Fund aims to pay distributions, the amount of each distribution may vary, or no distribution may be payable in a distribution period.

How we manage your money

The Fund invests in a diversified range of asset classes, with a bias towards growth assets. It employs a combination of active and passive investment management.

Total returns are calculated using the net asset value per unit for the relevant month end. This price may differ from the actual unit price for an investor buying or selling an investment. Actual unit prices will be confirmed following any transaction by an investor. Returns quoted are before tax, after fees and costs and assume all distributions are reinvested.
